

HANDSET ELECTRONIC DIRECTORY TELEPHONE ACCESS SYSTEMS

[TX3] Series
TELEPHONE/CARD ACCESS SYSTEMS

Features

- Stainless steel construction that enhances the aesthetics of any lobby
- Large scrolling 8 x 20 LCD display that eliminates the need for an external directory
- Available in 200, 1000 and 2000 name capacities
- Backlit 16 digit keypad with dedicated operational buttons for Page Up, Page Down, Call and Info
- Provisions for postal lock and camera
- Multi-lingual Display and Voice Greeting (English, French-Canadian and Spanish) that provides instructions on how to use the entry panel
- Concierge/Security Desk/Guard Phone capability
- Card Access Interface
- Built-in ADSL filter
- Supports both AutoDialer (ADC) and NSL (No phone bill)
- Ability to network panels together (peer-to-peer)
- Hands free, full duplex communication
- Flexible one to four digit resident codes
- Dials up to 18 digit telephone numbers
- System can be configured locally using the keypad or a computer with the TX3 configuration software
- Upload/download configuration files without taking the whole system offline
- Programming from one location
- Remote programming with the TX3 configuration software requires a computer equipped with a modem and a TX3-MDM modem module installed in the lobby unit
- Programmable daily usage postal lock
- 5000 record event log
- Elevator restriction capability
- Industry Canada and F.C.C. approved

Applications

- Provides resident/visitor access control for small buildings such as condominiums, apartment buildings, office buildings, gated communities and industrial buildings
- Designed primarily for indoor applications with up to 2000 residents or users

Description

Mircom's TX3 Handset Electronic Directory Telephone Access Systems are designed to provide primary resident/visitor access control for condominiums, apartment buildings, office buildings, gated communities and industrial buildings with up to 2000 residents or users.

The Continental Series enclosure is constructed of a heavy gauge stainless steel and is primarily designed for indoor applications. The Continental Series enclosures feature a handset, microphone, tamper resistant speaker and have provisions for a postal lock and camera to be installed.

These TX3 systems feature a large back-lit 8 line by 20 character electronics LCD display that scrolls a banner message as well as the resident names and dial codes. The enclosures also features a 16 digit backlit telephone style keypad with dedicated operational buttons for Page Up, Page Down, Call and Info. In addition, the system features a configurable multilingual display and voice prompts with a choice of English, Spanish, or French-Canadian.

These systems are programmable via the built-in keypad or using a computer with the optional TX3 configuration software. In addition these systems can also be configured remotely using the TX3 configuration software and the TX3-MDM Modem Module.

NOT TO BE USED FOR INSTALLATION PURPOSES.

Mircom reserves the right to make changes at any time without notice in prices, colours, materials, components, equipment, specifications and models and also to discontinue models.

The TX3 system utilizes hands-free, full duplex telephone communications between residents and visitors for granting access into the building. The system is configurable to support both an AutoDialer (ADC) system, which uses a dedicated phone line to dial preprogrammed numbers when the unique directory code is entered, and a No Phone Bill (NSL) system, which does not require a dedicated phone line.

The TX3 system comes standard as an ADC system and requires only a dedicated phone line. For NSL configuration the system requires additional hardware components such as relay cards and relay cabinets. (Please refer to the ordering information.)

Dimensions

TX3-200-8CH / TX-1000-8CH / TX3-2000-8CH

16 7/8" H x 10 3/8" W x 3" D

Enclosures are surface mount only.

Dimensions are for wall cutout.
